

A photograph of a large iceberg floating in the ocean. The iceberg has a prominent, rounded peak above the water. Below the surface, a massive, dark blue and green submerged portion is visible, extending far beyond the visible surface area. The water is a deep blue, and the sky is a clear, light blue with some wispy clouds. The text "Looking Below the Surface" is overlaid in large, bold, black font across the middle of the image.

Looking Below the Surface

Proposing Explanations

Correlation p-value: 8.643899684124575e-08

?

Correlation p-value: $8.643899684124575e-08$

Access to good healthcare

Access to personal transportation

Ability to quarantine

Educational attainment

Access to high-quality food

Median Income is a “Proxy” Variable

- Sometimes good: can be used in the place of a variable that you cannot measure
- Sometimes bad: hides the true causal factors, can be used to generalize and promote stereotypes

Which are the variables that stand in **as proxies** for a mechanism to get Covid – and which are more directly related to a mechanism?

Population

POP : Total population

P0_44 : Number of people ages 0 to 44

P45_64 : Number of people ages 45 to 64:

P65_ : Number of people ages 65 and older

Occupations

PEROFFTC : Percent office and telecommute workers

PERHSRV : Percent healthcare service workers

PERPSRV : Percent public service workers

PERF00D : Percent food service workers

PERCLEAN : Percent cleaning service workers

Socio-economic status

MEDINC : Median household income

PERNOINS : Percent without health insurance

How people get to work

PERAUTO : Percent personal automobile commuters

PERTRAN : Percent public transportation commuters

PERPEDB : Percent pedestrian and bike commuters

PERTELE : Percent telecommuters (work from home)

Racial/Ethnic neighbourhood types

PERBLK : Percent of population that is Black

PERHISP : Percent of population that is Hispanic

PERW : Percent of population that is White

PERASN : Percent of population that is Asian

Built environments

FDTRTPER : Percent food desert tracts

WS_5 : Hospital accessibility score (lower score = hospitals are farther away)

POP0DENS : Population density (per square meter)

PERCROWD : Percent housing units w/ > 1 person per room

In your groups...

1. Develop proposed explanation for the question:

“Why has Covid affected some communities more than others?”

1. Choose one explanatory variable that will help you test your proposed explanation.
